PROFESSIONAL SUMMARY

Senior Full Stack Engineer skilled in Node.js ecosystems and cloud platforms, highly adaptable to solve complex product challenges. Bridges the gap between technical execution and business goals by building scalable, cost-efficient applications that maximize efficiency and value.

EDUCATION

Associate Degree in Computer Programming | Uşak University - Turkey

Nov 2021 – Jan 2024

WORK EXPERIENCE

Community Lead | NextWork

Nov 2025 – Present

- Spearheaded AWS educational sessions and mentored students on CI/CD pipelines and scalable cloud deployment strategies. *Remote, USA*
- Designed high-performance cloud architectures, leveraging CloudFront and S3 optimizations to serve as global benchmarks for educational content delivery.

Senior Full Stack Developer (Contract) | Drv

Apr 2025 – Oct 2025

- Refactored Next.js frontend using DDD principles, improving maintainability and page load speed by 25%. *Lebanon*
- Implemented advanced SEO architectures (dynamic sitemaps, robots.txt customization, and semantic metadata.), drastically improving search engine crawling efficiency and page indexation rates.
- Integrated PostHog analytics, tracking ~80% of user interactions to drive data-informed product decisions.
- Architected a secure, scalable document management system on AWS, significantly improving upload efficiency and ensuring strict data privacy for sensitive client files.

Full Stack Developer | Gulf Crypto Bank

Apr 2024 – Jun 2025

- Developed secured shareholder dashboards with OTP auth; identified critical vulnerability impacting CEO-level access *Remote, Turkey*
- Optimized Next.js for 2,000+ shareholders, reducing frontend page load times by 30%.
- Optimized API latency by 80% (reducing response times from 600ms to 120ms) by deploying Redis cache layers and restructuring inefficient queries to significantly reduce database overhead.

Backend Developer | WebLayer

Apr 2023 – Mar 2024

- Developed high-performance Laravel APIs supporting ~10,000 daily requests and 40% user growth. *Turkey*
- Architected modular backend features with strict architectural boundaries, establishing ESLint rules and SonarQube pipelines to automate code quality and eliminate technical debt.
- Integrated Algolia search to replace legacy lookup systems, drastically reducing query latency and improving search relevance.

Web Developer | Marka Press

Oct 2021 – Mar 2022

- Delivered responsive React/Next.js web solutions tailored to diverse client business objectives. *Remote, Turkey*
- Migrated legacy web applications to Next.js, significantly improving Core Web Vitals, performance scores, and search engine indexing.

Magento Developer | CodenDot

Feb 2021 – Sep 2021

- Maintained Magento 2 eCommerce sites, delivering custom solutions that increased online sales. *Lebanon*
- Collaborated closely with UI/UX teams to optimize frontend features for enhanced usability and minimized checkout friction.

PROJECTS

Mind Arena : Competitive skill-validation platform featuring AI-driven MCQ quizzes, real-time challenges, and robust anti-cheat protocols. For Recruiters it Includes custom assessment arenas, smart candidate search, and recruiter hierarchy management.

NPM Packages : NextRay, speech-command-engine, ext-sync, valid-utils

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, TailwindCSS, Sass, Bootstrap

Backend: Node.js, NestJS, PHP, Laravel

Database/Infra: PostgreSQL, MongoDB, Redis, RabbitMQ, Docker, AWS

Engineering Practices: System Design, Microservices, DDD, Algolia, E2E Testing

LANGUAGES

Arabic (Native), English (Professional), Turkish (Fluent), French (Beginner)
