PROFESSIONAL SUMMARY

I am highly organized, efficient and proactive Full Stack Developer and Backend Developer . Utilizing my initiative and report writing skills, I deliver high-quality work consistently while meeting deadlines and maintaining confidentiality with strict adherence to internal rules and processes and to employment law. Now, I am seeking a new opportunity where I can apply my technical expertise and interpersonal skills within your firm with solid growth prospects

Relevant Work Experience

Gulf Software & Technology Ltd (Remotely)   Lebanon, 2023 - 2024
Full Stack Developer
- Developing and maintaining web applications for the company's cryptocurrency projects using React.js, ES6+, Tailwind CSS, Nest.js, TypeScript, and MongoDB.
- Developing "gulfcb.io," ensuring it meets the company's standards and requirements.
- Collaborating with cross-functional teams, including designers, product managers, and other developers, to design, develop, and implement new features.
- Participating in project planning and provide input on project timelines and deliverables.
- Improving application performance by optimizing code and using efficient algorithms.
- Regularly reviewing and refactoring code to enhance efficiency and maintainability.
- Discovering and fixing bugs in Laravel applications, providing technical support to ensure the stability and reliability of the web application.
- Conducting thorough testing and debugging to identify and resolve issues.

WebLayer For Web Services   Turkey, 2022 - 2023
Backend Developer
- Developing and maintaining server-side logic to ensure high performance and responsiveness.
- Designing and implementing data storage solutions, ensuring efficient database management.
- Integrating popular technologies like Algolia to enhance search functionality and improve user experience within applications.
- Implementing advanced searching capabilities, improving the overall search experience for users.
- Ensuring the security of applications by implementing best practices and conducting thorough testing to identify and fix vulnerabilities.
- Regularly updating and patching applications to mitigate security risks.
- Working closely with cross-functional teams, including front-end developers, product managers, and QA testers, to deploy new features.
- Ensuring all projects meet the company's quality standards and deadlines through effective collaboration and communication.

Marka Press   Turkey, 2021 - 2022
Web Developer
- Utilizing HTML, CSS, and JavaScript to create responsive landing pages for both the company and its clients, ensuring a consistent and engaging user experience across all devices.
- Implementing Bootstrap and jQuery in various projects to enhance functionality and responsiveness.
- Collaborating with design, product, and back-end teams to develop web products, ensuring seamless integration and high-quality deliverables.
- Working closely with project managers to determine project requirements and specifications.
- Rewrite HTML to meet industry and company standards for SEO and accessibility, driving significant increases in user traffic by achieving first-page Google search results.
- Writing clean, well-documented code that follows best practices and company standards.
- Conducting code reviews and providing feedback to peers to maintain high-quality codebases.

Codeandot   Lebanon, 2021
Magento Developer
- Developing and maintaining e-commerce websites using Magento 2.
- Implementing front-end and back-end functionalities to enhance website performance and user experience.

- Customizing and optimizing Magento themes and modules according to client requirements.
- Ensuring that websites are scalable, secure, and perform efficiently under varying loads.
- Working closely with cross-functional teams, including designers, project managers, and other developers, to deliver high-quality projects on time.
- Participating in project planning, requirements gathering, and technical discussions.
- Identifying and resolving technical issues and bugs in a timely manner.
- Providing ongoing support and maintenance for existing websites.

Dear Hiring Manager,

I am writing to express my interest in the Full Stack Developer position at your company. With a strong background in both front-end and back-end development, coupled with my passion for creating efficient, scalable, and user-friendly web applications, I am confident in my ability to contribute effectively to your team.

Over the past 2 years, I have developed a diverse skill set in various technologies, including React.js, Node.js, Express.js, MongoDB, and TypeScript. I successfully led multiple projects, ensuring the delivery of high-quality products that met both client and company standards. For instance, I developed and maintained "gulfcb.io," a web application for the company's cryptocurrency projects, using React.js, ES6+, Tailwind CSS, Nest.js, TypeScript, and MongoDB. This project required close collaboration with cross-functional teams to design, implement, and optimize new features.

One of my key achievements was optimizing the application's performance by refactoring code and utilizing efficient algorithms, which significantly enhanced user experience. Additionally, I have a proven track record of identifying and resolving bugs in Laravel applications, providing technical support to ensure stability and reliability.

In addition to my technical skills, I possess strong communication and project management abilities, which have enabled me to effectively coordinate with team members and stakeholders to deliver projects on time and within budget. My commitment to continuous learning and staying up-to-date with the latest industry trends ensures that I can bring innovative solutions to your development challenges.

Thank you for considering my application.

Sincerely,
MOEMEN SAADEH
